

UHU®

FOR A MORE SUSTAINABLE WORLD

UHU is a brand of Bolton Adhesives. With sales in over 125 countries worldwide and over 80 years of experience, Bolton Adhesives develops high quality products that fulfill every adhesive need at home, in the office, at school and for do-it yourself and professional purposes. We place great importance on product innovation and continuous product improvement, with a constant focus on consumer requirements.

For us, high quality means creating safe long-lasting products that work well and constantly developing products and packaging so that they have as little impact on the environment as technically possible – both during production and use. This is a challenge and a commitment, in which sustainability plays a fundamental role. We continuously find ways to protect and improve conditions for the health of our employees, the environment and for our millions of consumers worldwide.

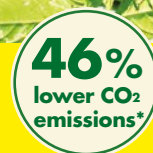

UHU® **ReNATURE** - PREMIUM QUALITY GLUES IN A RENEWABLE PACKAGING.

Saving of fossil resources and reduction of the greenhouse gas emissions are main drivers of sustainable development. Nowadays, still more than 90% of the produced plastics are based on crude oil at an annual volume of 250 million tons world-wide. Plant-based plastics however are made partially or fully based on renewable resources.

UHU® stic ReNATURE and **twist & glue ReNATURE** are the first glues with a packaging made mainly from plant-based raw materials, saving fossil resources and so reducing CO₂ emissions (compared to a conventional product). Additionally also the glues itself are mainly based on natural ingredients and so enable sustainable paper gluing.

*Compared to the standard UHU® stic/twist&glue averaged above the total lifecycle. (Calculated by denkstatt/Vienna, April 2013 and June 2014.)
