Remarks:**Sectors of Use (SU)**

- SU 10: summarizes all adhesive manufacturing (formulation and synthesis of adhesives including polymerization)
- SU 3: summarizes all industrial uses (e.g. SU6, SU16, SU17, SU18, SU19)
- SU 22: summarizes all professional uses (e.g. SU19)
- PROC 15 (Use a laboratory reagent) is not applicable because larger laboratories and R+D installations will be treated as industrial processes
- PROC 19 : after discussion we decided to take out the PROC19 since the default values in ECTOC-TRA do not correspond with the real use conditions, this PROC is now covered under PROC8a
- Consumer exposure** is not triggered by PROCs but by Product Category (PC) with four subcategories

RMM entries indicate options and describe which RMM are possible

Article Category (AC) does not apply for adhesives, since they are in a cured stage high molecular substances or polymers with no intention to be released.

Adhesive can be used for all type of articles therefore a proper assignment can only be made with an e-SDS for a specific preparation when specific issues like recycling are addressed.

Regarding the ERC 8c and 8f adhesives are always applied onto a matrix. If there are solvents in adhesives, they are seen as part of the product and not as processing aid. The release of such solvents into the environment is addressed by the SPERCs.

Code	Short ES title	Short description of process or activity	Use descriptors						Life Cycle Stage(s)				Exposure Modifier				RMM		SPERC*	Temperature					
			Sector of use (SU)	Process Category (PROC)	Product category (PC)	Product Sub-category	Article Category (AC)	Environmental Release Category (ERC)	Manufacture	Formulation	Industrial	Professional	Consumer	Service Life	duration and frequency (exposure time)	Outdoor	Indoor	respiratory protection	Eye protection (goggles)	protection of hands (gloves)	<40 °C	40°-70 °C	>70 °C

Sectors of Use

SU10	Chemical formulation and/or re-packaging
SU3	Industrial Manufacturing & Maintenance (all)
SU 16	Manufacture of computer, electronic and optical products, electrical equipment
SU 17	General manufacturing, e.g. machinery, equipment, vehicles, other transport equipment
SU21	Private households (= general public = consumers)
SU22	Public domain (administration, education, entertainment, services, craftsmen)
SU 19	Building and construction work

Process Categories

PROC1	Use in closed process, no likelihood of exposure - Industrial setting
PROC2	Use in closed, continuous process with occasional controlled exposure (e.g. sampling), Industrial setting
PROC3	Use in closed batch process (synthesis or formulation) - Industrial setting
PROC4	Use in batch and other process (synthesis) where opportunity for exposure arises, Industrial setting
PROC5	Mixing or blending in batch processes for formulation of preparations and articles (multistage and/or significant contact)
PROC6	Calendering operations Industrial setting
PROC7	Spraying in industrial settings and applications, Industrial setting
PROC8a	Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at non dedicated facilities.
PROC8b	Transfer of substance or preparation (charging/discharging) from/to vessels/large containers at dedicated facilities.
PROC9	Transfer of substance or preparation into small containers (dedicated filling line, including weighing), Industrial setting;
PROC10	Roller application or brushing of adhesive and other coating, Industrial or non-industrial setting
PROC11	Spraying outside industrial settings and/or applications
PROC12	Use of blow agents in manufacture of foam, Industrial setting;
PROC13	Treatment of articles by dipping and pouring, Industrial or non-industrial setting;
PROC14	Production of preparations or articles by tabletting, compression, extrusion, pelettisation, Industrial setting;
PROC15	Use a laboratory reagent, Non-industrial setting;
PROC16	Using material as fuel sources, limited exposure to unburned product to be expected, Industrial or non-industrial setting;
PROC17	Lubrication at high energy conditions and in partly open process, Industrial or non-industrial setting;
PROC18	Greasing at high energy conditions, Industrial or non-industrial setting;
PROC19	Hand-mixing with intimate contact and only PPE available. Non-industrial setting.

Product Categories

PC1	Adhesives, sealants & coatings
-----	--------------------------------

PC1 - subcategories

B01	Glues, hobby use
B02	Glues, D.I.Y.- use, carpet glue, tile glue, wood parquet glue
B03	Glue from spray
B04	sealant

Environmental Release Classes

ERC2	Formulation of preparations
ERC5	Industrial use resulting in inclusion into or onto a matrix
ERC8c	Wide dispersive indoor use resulting in inclusion into or onto a matrix
ERC8f	Wide dispersive outdoor use resulting in inclusion into or onto a matrix
